

SCUMLORDS FACING EVICTION

We decided to make a parking lot at 740 El Camino Del Mar, home of San Francisco rich, Zionist bloodsucker, Walter Shorenstein, who profited from the misery and suffering of the people at the International Hotel.

Under ruling class laws it was completely "legal" for you, Shorenstein, as well as Four Seas to decide to build a parking lot out of what was home for many elderly San Francisco citizens. You didn't seek their consent; you didn't need it. You rich parasites feel you won another victory with your "money is more important than lives" approach at the International Hotel.

Your laws were used to uphold your rich prey on the poor order. BUT AN UNJUST LAW, IMPLEMENTED BY THE RICH, FOR THE RICH, AND AGAINST THE POOR IS FAR FROM OVER.

The decadent morality of scum-lords is justified by attitudes such as San Francisco Examiner editorial August 5th. "That issue (the International Hotel) has now been resolved in favor of the law". People are not fooled by the word "law" - they know it is always used to uphold the rights of the rich and powerful against the basic human rights of the poor.

The rich feel the poor should readily accept "replacement housing" irregardless of old age, community ties, etc. We feel it's time for some of you rich to take up "replacement housing" because we're going to drive you out of house and home.

We will not sit back and be brutalized by you! We will show you the same respect or lack of respect that you show poor people. Your warped laws will never protect you buzzards against the rage and justice of the people.

We call on the people to show their rage to those responsible for the housing plight of poor people in San Francisco. Plug up parking meters, attack the supervisors (house, car, property or person), go after ruling class landowners who throw poor people out in the streets as well as the legal stooges who uphold and carry out these decadent schemes. Make sure that anything that replaces the International Hotel is a booming success.

Unite with other tenants. Draw up tactics that will combat the rich parasites and their thugs. Remember that the basic human rights we've been denied will never be acquired through ruling class laws or for the asking - rather they must be taken by force. Our tactics must reflect this understanding.

We will fight back! We will not be pacified by token crumbs. We will not live under the heels of rich bloodsuckers!!

¡Hasta la Victoria, siempre!!
